DETAILED ACTION

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 13-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Poon et al. (US 5,436,488).

Poon discloses the steps of:

For claims 13-22:

a nitrogen doped insulating liner (28, fig. 4) grown on sidewall of the shallow trenches; and

a gap filling insulating material (34, fig. 6) filling the shallow trenches level with the surface of the semiconductor substrate (col. 2, ln. 54 – col. 3, ln. 14).

Poon fails to disclose a plurality of trenches. However, it is well known in semiconductor manufacturing to form a mask that patterns more than one trench, therefore it would be obvious to one of ordinary skill in the art to form a plurality of trenches in Poon.
